Education

University of Texas at Dallas — Richardson, TX
Master of Science in Computer Science, GPA: 3.482/4.0 — *Expected December 2026*

University of Texas at Dallas — Richardson, TX
Bachelor of Science in Computer Science — *August 2021 – December 2023*

Technical Skills

Languages: Java, Python, SQL (Postgres), JavaScript, HTML/CSS
Frameworks: React, Node.js, Next.js, JUnit, PyTorch, FastAPI
Developer Tools: Git, Docker, AWS Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse, Google Antigravity
Libraries: pandas, NumPy

Experience

Software Engineering - AI Trainer — Mar. 2026 – Present
Handshake AI Solutions LLC — *Remote*

- Developed features for Python web applications using FastAPI and PostgreSQL, contributing to 20+ production endpoints/services.
- Built Fail-to-Pass (F2P) and Pass-to-Pass (P2P) test suites to validate bug-fix correctness and guard against regressions, catching recurring edge-case bugs across 30+ tasks/PRs.
- Diagnosed automated test failures to isolate integration and edge-case bugs, refactoring modules to meet CI/CD gates and containerized backend services with Docker.

Technical Code Reviewer — Feb. 2026 – April 2026
Outlier — *Remote*

- Conducted code reviews and runtime execution tests on 100+ AI-generated software snippets, identifying logic flaws, syntax errors, and unhandled edge cases while maintaining a 95% evaluation accuracy across technical coding tasks.
- Evaluated complex algorithmic outputs and instruction compliance using standardized technical metrics, authoring detailed analytical reports that helped identify model errors and improve evaluation quality.
- Analyzed recurring failure patterns across 50+ coding evaluation tasks, providing structured technical feedback that contributed to a 10% improvement in evaluation consistency.

Projects

Bling.closet Shopping Landing Page | *MongoDB, Express, React, Node* — March. 2026 – May 2026

- Architected and developed a responsive, full-stack e-commerce platform using MERN stack.
- Engineered a custom RESTful API with Express and Mongoose for full CRUD inventory and order flows, utilizing Google Antigravity to accelerate schema prototyping and end-to-end unit test generation.
- Integrated AWS S3 for scalable cloud storage, utilizing Multer to handle direct, multipart image uploads to the cloud.

PF Tracker | *MongoDB, Express, React, Node* — November 2025

- Architected and mentored the development of a MERN-stack personal finance management web application featuring Category-Based Budgeting, Subscription Management and AI Financial Assistant.
- Implemented RESTful backend services using Node.js and Express.js and built a responsive React frontend; deployed on AWS for scalable, low-latency access.
- Integrated an AI financial assistant to process user transaction data and generate personalized budgeting insights, implementing prompt-based workflows to transform structured financial data into actionable recommendations.

Event Ticket Website | *Rest API, Java Spring Boot, Maven* — October 2025

- Frontend: Designed and implemented a user-friendly interface using HTML, CSS, and JavaScript, ensuring cross browser compatibility and responsiveness.
- Backend: Developed a robust server environment with Java Spring Boot, designed RESTful APIs, and leveraged Hibernate for efficient database operations.
- Database: Managed data with Hibernate, ensuring security and performance optimization.
